Correlation

SAT scores

- Background

You are given data on the SAT scores from the correlation exercise.
- Task 1

Calculate the correlation coefficient of the two datasets.
- Task 2

Comment on the strength of the correlation between the two datasets

	Writing	Reading		$(x-\bar{x})*(y-\bar{y})$
	344	378		19,490.16
	383	349		19,004.16
	611	503		1,179.36
	713	719		44,714.16
	536	503		234.36
Mean	517	490	Sum	84,622.20
			Sample size	5
			Cov. Sample	21,155.55
			Correlation coefficient	0.94

The correlation coefficient indicates that writing and reading are highly correlated
