1	Skewness																							
2																								
3	Background You are given two datasets																							
4	Task 1 Identify the skewness of dataset 1. You may use the formula from the lesson, the skewness formula in excel (=SKEW) or you can plot it on a graph																							
5	Task 2 Identify the skewness of dataset 2. You may use the formula from the lesson, the skewness formula in excel (=SKEW) or you can plot it on a graph
