

Standard normal distribution

z-table

The table summarizes the standard normal distribution critical values and the corresponding $(1-\alpha)$

Example 2: The general case (one-sided hypothesis testing)

Question: what is the critical value for an $\alpha = 0.1$

Step 1: Find $(1-\alpha)$

$$1-\alpha = (1-0.1) = 0.9$$

Step 2: Search for the closest value to 0.9 in the table.

In this case it is: **0.8997**

Step 3: The critical value (z), is given by the sum of the corresponding row and column headers

$$1.2+0.08 = 1.28$$

Answer: $z_{0.1} = 1.28$
