Ice cream shop

Note: You may solve these problems both on paper or in a software of your choice. The medium is not crucial.

Background

There is an ice cream shop, that is operating in New York, LA and San Francisco.

Data

You have sold 12,327 ice creams in New York; 17,129 in LA and 19,923 in San Francisco.

Task

Order the data in a frequency distribution table.

City	Frequency of Ice Cream sold
New York	12,327
LA	17,129
San Francisco	19,923
