

What is a distributon

One die

| Outcome  | Probability of occurance |
|----------|--------------------------|
| 1        | 0.17                     |
| 2        | 0.17                     |
| 3        | 0.17                     |
| 4        | 0.17                     |
| 5        | 0.17                     |
| 6        | 0.17                     |
| All else | 0.00                     |
|          | 1.00                     |

Two dice

| Sum      | Probability of occurance |
|----------|--------------------------|
| 2        | 0.03                     |
| 3        | 0.06                     |
| 4        | 0.08                     |
| 5        | 0.11                     |
| 6        | 0.14                     |
| 7        | 0.17                     |
| 8        | 0.14                     |
| 9        | 0.11                     |
| 10       | 0.08                     |
| 11       | 0.06                     |
| 12       | 0.03                     |
| All else | 0.00                     |
|          | 1.00                     |
